ACTIVATE YOUR 6685 DRY VEST

// Fill vest with 13-20oz. (400-600 ML) water, massage upward to distribute water to the front of the vest. *Open cap and squeeze out excess water.* The inner membrane absorbs the water and cooling will be immediate.

// Activation will take place within 5 minutes. However, filling 30 minutes prior to use is recommended due to variances in conditions

// Up to 3 days of cooling relief

// To reactivate, simply refill with water

CHILL-ITS® 6685 DRY VEST TECHNOLOGY

// The Dry Evaporative Vest features the use of a patented technology that cools the body's core zones: front (chest and abdomen) and back

// Inner lining as well as outer shell completely dry to the touch

// Max cooling capacity=15° C// 59° F

// Performs best when humidity is less than 80%
