Easily handle a heavy drum with a Morse Hydra-Lift Karrier. Lift, move and control pouring of a 55-gallon (210 liter) drum weighing up to 800 Lb. (363 kg) with minimal effort. Handle a variety of drums by installing the correct accessories for your drum. Models with maximum pouring heights of 72" or 96" (183 or 244 cm).

You can raise and control dispensing as necessary. Increase pouring angle for full discharge, reduce to control the pour rate, or reverse to stop pouring and deliver partial drum contents.

Material is poured forward straight from the drum with variable lift and pour angles. Faucets, pipe, valve extensions, etc. may be attached to the drum.

Though most often used to lift and pour, the Hydra-Lift Karrier can also be used to lift drums on and off scales, platforms, conveyors or trucks, move drums to or from storage, or position drums of parts for hand access at work stations.

Model 400A-96-110 with 96" dispensing height and electric power lift and tilt.

To order complete units with any of the power options below, use the power option number as a suffix on manual model number. Example: Model 400A-96-115 is 96" (244 cm) lift model with battery powered lift and tilt. Power-Tilt Options must be ordered on new units from the factory. All units with power options factory installed are shipped fully assembled.

Power Lift Options

Power-Lift Options ease drum lifting, but retain manual tilt control. Hand crank tilt control is on 60" lift height units. Models with 72" and 96" lift heights have pull chain and chain wheel tilt control.

Power Option #	Motor Type	Motor Control	Ship Wt. Adder
120	AC, 1HP/115V, TEFC	Switch, Cord, Plug	40 Lb. (18.1 kg)

MORcinch Options

The MORcinch drum holder on Hydra-Lift Karriers is designed to handle a 55-gallon (208 liter) steel or fiber drum. It automatically adjusts from 22" to 23.5" (56 to 59.7 cm) in diameter. The cinch chain with pawl and ratchet mechanism is used to secure the drum in the holder. To handle other drums, order one of the following:

The **Bracket Assembly** provides a brace at top and bottom of your drum to prevent it from slipping lengthways through the drum holder. The Bracket Assembly is required to handle a rimless plastic drum, and recommended to more securely handle a fiber drum. It adjusts for 31" to 39" (79 to 99 cm) tall drum.

Part # 4556-P Bracket Assembly.
Part # 4556M-P Spark Resistant Bracket Assembly.

The **Top Rim Clamp** grips the upper rim of your drum to prevent it from slipping through the drum holder. Use to handle a 55-gallon rimmed plastic or fiber drum. To handle a 55-gallon plastic drum with top rim, you must install either the Bracket Assembly or the Top Rim Clamp.

Part # 4560-P Rim Clamp Assembly.
Part # 4560M-P Spark Resistant Rim Clamp Assembly.

Web Strap with Ratchet

MORcinch™ Drum Holder with Option # 5115i-P Web Strap and Ratchet installed (not for use on spark resistant models)

For a smaller diameter drum, **Diameter Adaptors** install easily without tools and are quickly removed. Diameter Adaptors for 17.5" (44.5 cm) diameter or smaller have brackets at top and bottom of the drum. They adjust for a drum up to 38" (96.5 cm) tall. Spark resistant and stainless steel Diameter Adaptors are also available.
